PC接入百度统计

步骤如下:

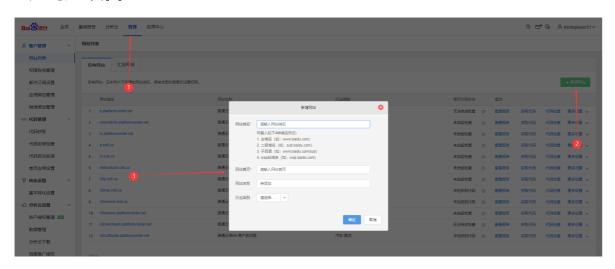

1、注册登录账号

https://tongji.baidu.com/web/welcome/login

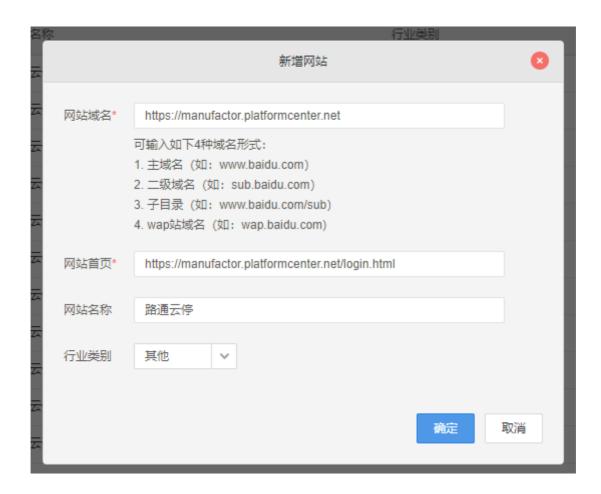

(Tips:原先有百度账号的直接用原来的账号就好)

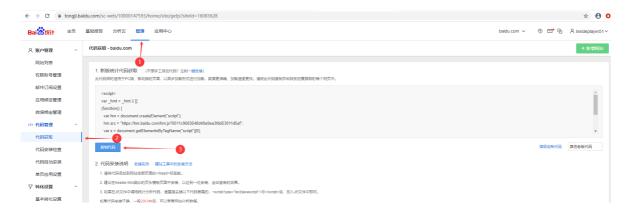

2、创建项目

举个栗子: (路通云停厂家测试服举例)

3、应用到代码中

```
| Continue | Continue
```

4、自定义配置

```
代码获取 - baidu.com
                                                                                                                                                                                      + 新增网站

    新版统计代码获取 (不想手工能加代码?立刻一幢变速)
此代码同时运用于PC体。移动端的页面,以异步加维形式进行加速。数据更准确。加敏速度更快。请将此代码复制并标品到您要指摘的每个码页中

    权限账号管理
    应用绑定管理
                        var _hmt = _hmt || [];
    微值绑定管理
                        (uncom) {
    var hm = document.createElement("script");

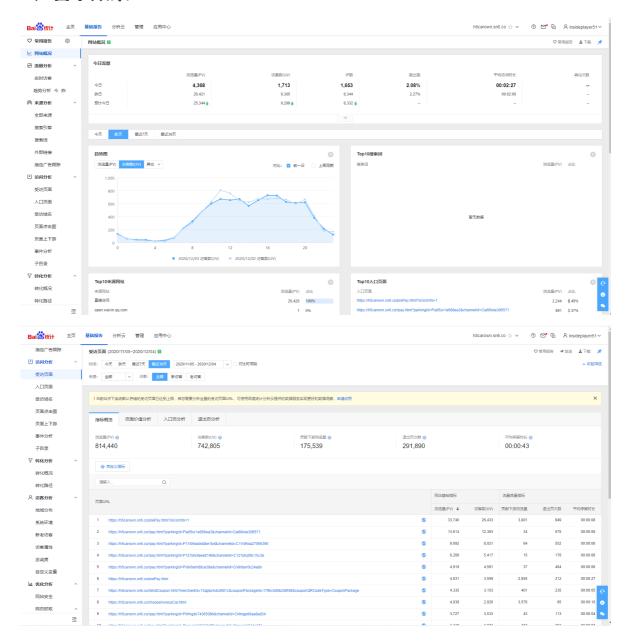

hm src = "https://hm baldu.com/hm js*f001tc9683648d49a9ea3fdd53011d5af];

var s = document.getElementsByTagName("script")(0); ]
代码获取
                                                                                                                                                                          高级定制代码 其他老版代码
    代码安装检查
                var _hmt = _hmt || [];
                    var hm = document.createElement("script");
                    hm.src = "https://hm.baidu.com/hm.js?" + window.config.baiduHm;
                    var s = document.getElementsByTagName("script")[0];
                    s.parentNode.insertBefore(hm, s);
                 })();
              </script>
        X us config.js static
          model.is src\base-com...
                                      5 var host = 'http://172.16.2.36:8080' /
6 // var host = 'http://172.16.2.47:8080'
          V index.vue src\pages\pa...
          model.js src\business-c...
methods.js src\pages\c...
          model.js src\pages\voice
methods.js src\pages\v...
                                            var baiduHm =
                                            var manufacturerSituationMap = 'http://datav.aliyuncs.com/share/c573c9f90bdf9e4115ae6fae7f3cb144' //var technologySituationMap = 'https://datav.aliyuncs.com/share/76ce6e8140f84e5fbf36366250151c6e' //var dealerSituationMap = 'http://datav.aliyuncs.com/share/ad384455c3477bfa9d3998c23ba6a098' //终销态
        > e css
         > 🌅 other
                                             window.config = {
            s config.js
           ★ favicon.ico

md5.js
                                               version: 'w2020.19',
           eslintianore
                                                H5MerchantsUrl: H5MerchantsUrl,
           eslintrc.js
                                                baiduHm: baiduHm,
                                                manufacturerSituationMap: manufacturerSituationMap,
          technologySituationMap: technologySituationMap,
                                                dealerSituationMap: dealerSituationMap,
```

将问号后面的字符串单独提出来 放在config.js中; 然后把字符串交给部署,让部署替换掉config中的配置。搞定!

5、看下效果

这是车主H5正式服上的数据
